www.zarq.group

Materiality Spec

Printed on 600gsm cotton cardstock with customized matte edges. The front features black foil stamping on Obsidian black, and the back is pure white letterpress.

02 STATIONERY: OFFICIAL LETTERHEAD LAYOUT

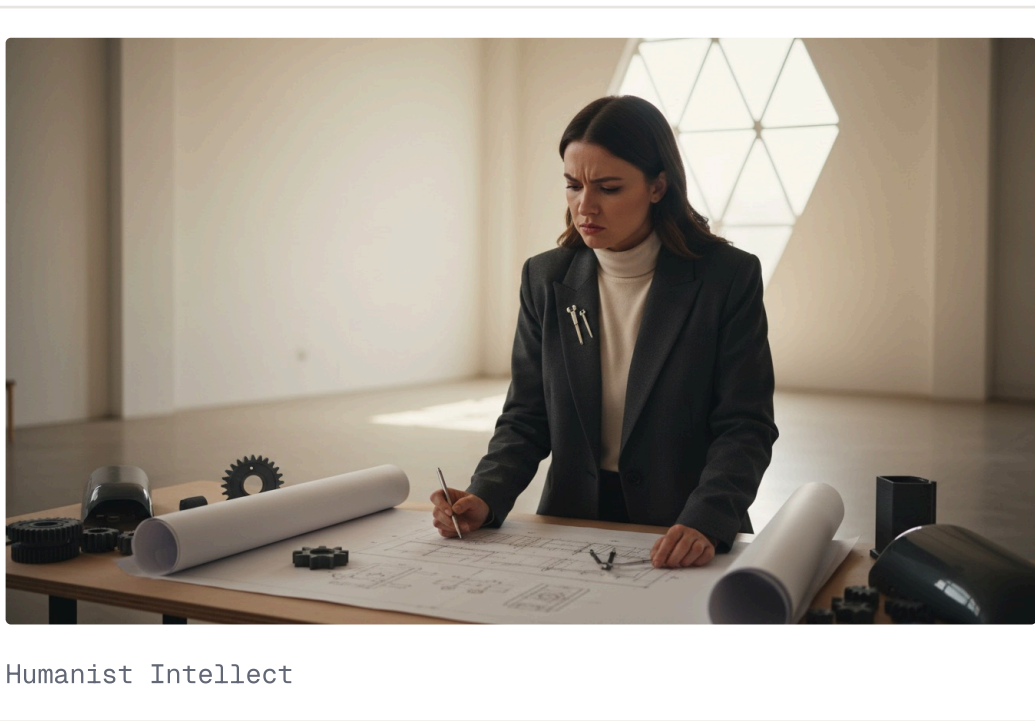

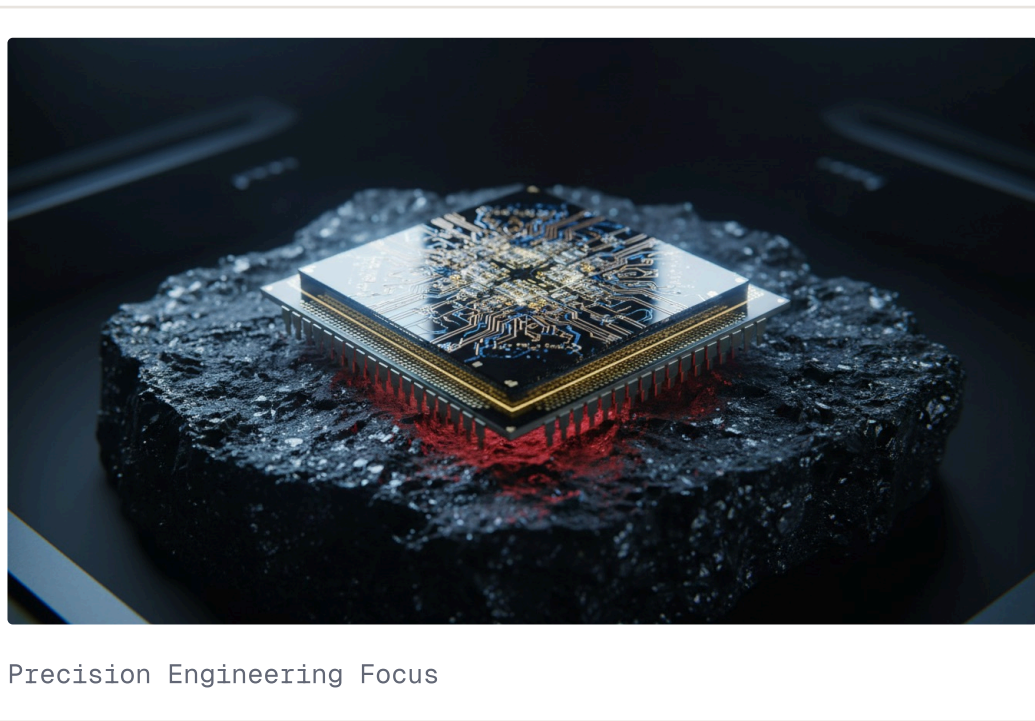

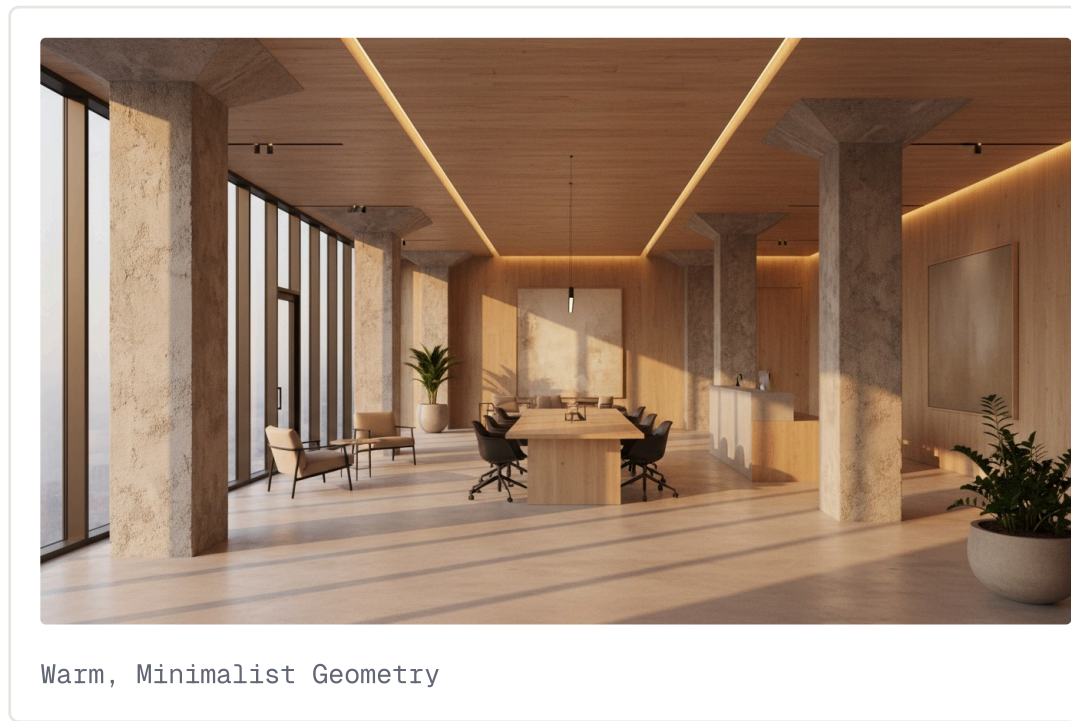

System Architecture

The formal letterhead system maintains an ultra-restrained margin hierarchy. It ensures official communications convey the seriousness and precise technical calibration behind Zarq Technology Group.

Grid Parameters

Set margins at exactly 12% width for comfortable reading. Use standard corporate communication formats strictly.

03 BRAND PHOTOGRAPHY DIRECTION

04 IDENTITY COMPLIANCE: DO'S & DON'TS

● CORRECT EXECUTION

Always render the wordmark in flat Obsidian Black or paper white. Maintain at least 50% clearspace bounding box boundaries.

● INCORRECT / PROHIBITED

Never skew letters, apply low-grade drop shadows, or gradient fill the core wordmark geometry. Maintain strict geometric logic.
